THE BUSINESS BENEFITS OF HUSKEESWAP

Single-use plastic is a massive problem, with over 600 billion coffee cups and lids being produced globally every year. While there is a current drive towards compostable products, single-use is still single-use. Often these cups are more expensive for cafes, have environmental problems of their own, and still end up in landfill.

Here are some great motivations to change to a Reuse model:

Conscious consumerism is on the rise - customers will make decisions based on their values and expectations

Become a Champion of sustainability and visibly demonstrate your values and commitment

Be part of the growing circular economy movement and transition away from a linear-consumption model

You create new and loyal customers while breaking old habits and forming new positive ones.

With Huskee, you have a simple and ethical way to take action. We design products and systems that are both innovative and intuitive, and we support you along your journey of change. There has never been a better time to **be the change**.

WHY SHOULD YOUR BUSINESS CONSIDER HUSKEESWAP

By implementing **HuskeeSwap** with us, you save money in multiple ways. With low margins and increasing costs, it's simply just good business.

EXAMPLE CAFE SAVINGS

- ✓ A cafe spends over \$23,000 on disposables per year*
- ✓ A single customer swapping 5 days a week would save you \$83 per year
- ✓ Just 10% of customers swapping would save your cafe over \$2,300 each year
- ✓ Plus an additional \$4,000 from HuskeeCup sales per year (median in Australia)

**based on a 200 coffees/day volume and cup/lid costing \$0.32*

PEOPLE

- ✓ Your customers care and have increasing expectations of businesses
- ✓ Engage with the rising conscious consumer movement
- ✓ Strengthen loyalty and help customers take action through active engagement
- ✓ Have inspiring and positive conversations about your initiatives

PROFIT

The **HuskeeSwap** system helps any business or organisation in three proven ways:

- ✓ Ongoing savings on disposable packaging costs, and waste bills
- ✓ A new revenue stream through new cups sold as retail
- ✓ Attracting new and retaining customers using the **HuskeeSwap** system

PLANET

- ✓ The world's first coffee cup made from coffee husk; our industry waste
- ✓ All products contain recycled and repurposed materials
- ✓ True circular economy through collection of end-of-life cups by the **HuskeeLoop** program

With single use cup bans increasing nationally and globally, don't simply increase costs with compostables. Save money and protect our resources. Single-use is always single use, regardless of the materials

UNIQUE ADVANTAGES OF HUSKEE
